STEINBAUER.

Setting the standard in Agricultural performance.

Agriculture is a tough business to be in. With the memory of the slow and late harvesting season of 2009 fresh the minds of the farming community, the question on everyone's lips is "What can I do to be more efficient?"

Andy from Nebraska - JD 8320

"I was talking with Ryan at a farmshow about the problems I was having with a pressure box I had put on my tractor and the guy next to me started telling me how great Steinbauer tuners work; so I had Ryan get me one and man what a difference! Before the tractor was surging at times and seemed like the power would fade in and out. But with the Steinbauer tuner on, the difference is like night and day - it works like a dream, plus im using less fuel. Great product. Thanks Ryan."

With productivity continuing to climb, the industry requires more horsepower. Historically greater horsepower was achieved by machines having a larger engine; however there is an alternative. With a PowerModule from STEINBAUER installed you will achieve a 25% increase in power and torque from your existing tractor or combine. This increase in power will make the same size tractor more efficient, productive and versatile.

The STEINBAUER PowerModule is the **premier brand** within the diesel tuning industry. An industry innovator being one of the first companies to develop and manufacture additional 'Plug n Play' technology for modern diesels and a pioneer in the Ag tuning market.

STEINBAUER is a truly unique product, being one of the most advanced performance modules in the market. „You can't gain that kind of experience and engineering expertise

overnight. We have a distinct advantage because we see the new diesel technology first in Europe and our team just does this.... they're not pre-occupied by developing, producing or selling other products," said Director Herbert Steinbauer. „We've been in this industry for over 15 years and are experts in our field. We have the most extensive - proven and working - application list on the market," Steinbauer goes on to say.

STEINBAUER'S "Intelligent Module" allows you to cover more acres per hour, **reducing your planting or harvesting time** - this in turn saves you fuel and man hours. Developed in both the US and Europe and manufactured in Austria, the system undergoes stringent research, development and quality control measures before it is released. Because the STEINBAUER PowerModule is an additional electronic that communi-

A customer of Steve Hannam - Jake K from Iowa.

"I had a farmer come up to me saying he saw my car parked outside. He said he had one of our modules in his Challenger MT 765C and loves it. In fact, he has tried a couple of different competitors products, he said they are sitting on his shelf because they don't work. He loves his Steinbauer so much - he is buying one for his Steiger 465 quad track."

STEINBAUER - Proven quality costs a little more.

- + LARGEST application list on the market
- + over 1000 Agricultural applications
- + install in under 30 minutes
- + no change in Common-Rail pressure
- + no ECU flashing - our power module is invisible
- + 15 years experience in developing, testing and manufacturing of agricultural machinery products
- + tested and sold across the world - operating in all climate conditions

Do you have what it takes to be a STEINBAUER Dealer?

At STEINBAUER we don't just add new dealers and distributors to our list, first we take the time to learn a little about you and your business. STEINBAUER is a full service company and we pride ourselves on excellence in customer service and we like to ensure that our dealer network is the very best available. We offer full technical training, after sales service and support and world class marketing material and assistance to our dealers. Only an authorized STEINBAUER dealer gets to display this seal of approval. Do you have what it takes to join the STEINBAUER team?

tes with the ECU and not a downloadable tuner or invasive pressure box - it does not rewrite the factory computer's tuning or increase common rail pressure. The module can be easily removed when you take your machine in for service or repair.

If you are looking to get the most out of your current machine and increase its power and efficiency - then choose a world-renowned product that has been developed, sold and tested in over 30 countries and call the team at STEINBAUER today. **There is simply no compromise for quality and experience.**
